User manual

Please read this manual before using the product to fully understand its use and operation.

CAUTION

- The company reserves the right to modify the contents of this manual without any further notification. Some functions may vary in certain versions of software.
- Please charge this product with the charger provided for no less than 2 hours before using it for the first time.
- Use only the charger that is included with the product. Make sure that the charger and the smartwatch are properly connected while charging. Do not charge if the watch has water (or sweat) to avoid short circuits and damaging the product.
- The two contacts of the charging cable cannot be in contact with a conductor material at the same time, it will cause a short circuit and burn.
- Do not expose your smartwatch to other liquids such as salt water, chlorinated water, and other liquids and chemicals.
- Do not expose your device to hot water or water vapors.
- Water and dust resistance is not permanent and may decrease as a result of regular use.
- Clean the smartwatch regularly, especially its inner side, and keep it dry. Skincare product should not be

used on the wrist that wears the smartwatch.

- Don't look steadily at the green light of the sensor on the back of the smartwatch, it may cause eye irritation.

System Requirements:

Android: Android 4.4 or above

iPhone: iOS 10.0 or above

Download and install the application

1. Go to our website www.mareasmart.com and find your smartwatch model. The model number is found on the back of the smartwatch (it starts with "B" and is followed by five digits).
2. Download and install on your phone the official app that corresponds with your smartwatch model.
3. Open the app and enable all the permissions that the app requests.
4. Turn on Bluetooth on your phone.
5. Make sure that the smartwatch has not been linked directly through Bluetooth to your phone. If so, unlink it.
6. Bind your Marea Smartwatch through the app.

Notes on linking:

- Only one smartwatch pairing application should be installed on the phone to ensure that the connection with the smartwatch is normal. If several applications are connected, they can affect the connection between the watch and the phone.
- The number of devices that can be connected to a phone is limited, to ensure that the connection with the smartwatch is normal please keep a maximum of 3 frequently used devices connected by Bluetooth.
- Make sure the location feature is activated on the phone.
- Some Android phones will prompt you that they cannot install the app. Please go to 'settings' of the phone and authorize the 'Unknown source' .
- When the mobile phone requests permissions, click "Allow". On the contrary, you may not receive notifications, scan QR codes, open the remote camera or use other functions. These permissions do not affect the flow of the phone or other information on the phone.
- Some Android phones may accidentally close the app when cleaning the applications. Please keep the app

running in the background. To turn on this function on your phone: open the phone settings - application management - official application - rights management - backstage management - select background running. The setting method may be different due to different mobile phone versions and models.

- For iPhone: if the phone is in standby or hibernation mode for a long time (for example, the phone has not been in use for 2 hours or more and the screen is off), the application will be closed by the iOS system, so the application and the watch will be disconnected and the application functions will not be available. Re-activate the phone and it will automatically reconnect.

Smartwatch operation

Turn on/off

Press and hold the side button for 3 seconds to turn on the smartwatch; short press the side button to activate the watch when in standby mode.

Press and hold the side button for 3 seconds to turn off the smartwatch.

To restore the smartwatch to factory settings, press and hold the side button for 15 seconds.

Button and screen operation

From the home screen on the smartwatch:

Swipe down to see the status bar. It shows the connection status and battery, and includes quick access to some functions:

- Brightness control
- Info about smartwatch (it includes the BT address of the smartwatch that you will need to link it to your phone)
- Do not disturb mode
- Music remote control

Swipe left for more shortcut functions:

- Draining (it vibrates so humidity can be eliminated)
- Flashlight
- Turn wrist to turn on screen
- Sound on/off
- SOS Call
- Location on/off

Home screen selection

Long press the home screen or rotate the side button to enter the selection interface, swipe right / left to see all available options. Click on the desired screen to make it your home screen.

On the app you can download other predesigned home screens as well as select an image saved on the phone to set as your home screen.

Main functions in Smartwatch

The main menu includes the following functions:

Phone / Call Records

Click on "Open" to turn on the BT call function and the BT name of your smartwatch will be shown on the screen. On the linked phone, find that name in the phone's Bluetooth list and bind it. After they are successfully connected, you can use the smartwatch to answer or hang up the Bluetooth calls. You can also use the keyboard to input a phone number to make Bluetooth calls.

Messages

Shows the last 10 messages / notifications. The phone

and the watch must be linked and within the Bluetooth range. Slide to the bottom and press the delete icon to clear all message records. The last notification received will replace the oldest one. On the app you can select what type of notifications you want to receive on the smartwatch.

Contacts

Bind the watch to the APP first, then open the APP, tap “Device” > ” Frequent contacts” > “Add contacts” > “Sync to watch” , to add up to 20 contacts from your phone to your smartwatch.

Sport data

Shows the steps taken, the distance traveled and the calories consumed on the current day. On the app you can check the historical data.

Sports

Includes different sport modes. Click on the corresponding exercise mode to begin the recording. Click on the stop button to end the exercise and save the data (the exercise can be saved if the time is longer than 1

minute). On the app you can check the historical data.

Heart Rate

Upon entering the function, the heart rate measurement will start automatically. Wait about 30-60 seconds for the measurement to finish and the result will be displayed. Slide up to see a graph with last heart rate tests. On the app you can check the historical data.

ECG

Enter the ECG menu on the app and then enter the ECG function on the smartwatch. Wait for a while for the measurement to finish and the data will be saved on the app. The phone and the watch must be linked and within the Bluetooth range.

Blood Pressure

Upon entering the function, the blood pressure measurement will start automatically. Wait about 30-60 seconds for the measurement to finish and the result will be displayed. Slide up to see a graph with last blood pressure tests. On the app you can check the historical data.

Blood Oxygen

Upon entering the function, the blood oxygen measurement will start automatically. Wait about 30-60 seconds for the measurement to finish and the result will be displayed. Slide up to see a graph with last blood pressure oxygen. On the app you can check the historical data.

Notes on health functions:

- The heart rate, blood pressure, and blood oxygen functions require the watch and arm to be in contact, and the watch should not be too tight or too loose. The test can be inaccurate if it is too tight because it will affect blood flow, and if it is too loose because it will affect the monitoring of the heart rate sensor.
- Be sure that there the heart rate sensor on the back of the smartwatch is clean. Skin color, hair density, tattoos and scars may affect the accuracy of the measuring results.
- The results of the smartwatch measurements are only indicative and cannot substitute in any case for any medical test. Please follow your doctor's instructions and do not rely solely on these results for an evaluation.

Music remote control

Displays buttons to play / pause and to skip to previous or next song, to remotely control the music playing on the paired phone. If BT call function is open, the music will be played on the smartwatch. The phone and the watch must be linked and within the Bluetooth range.

Sleep Monitor

If you have worn the watch during the previous night, it shows the total sleep time of last night (between 18:00 and 10:00), as well as light and deep sleep times. You can check the historical data on the app.

Stopwatch

Click on the start icon to start the count. Click the reset icon to reset to 0.

Weather

Displays the current weather and temperature. The phone and the watch must be linked so the watch can receive the weather info from the phone.

Time setting

You can select the time displayed on the smartwatch and the time format (12 or 24 h) when it is not linked to the app.

Voice assistant

If BT call function is open, click on the microphone icon to wake up the phone's voice assistant (for example, Siri on iOS phones).

Alarm clock

You can set up to 5 alarms. When the time has come for it to go off, the smartwatch will vibrate and turn on the screen to show the alarm clock icon.

Flashlight

The screen will light up so it can be used as a flashlight.

Emergency contact

You can set an emergency contact. To make a call to that number, keep pressed the side button and slide right on the SOS signal.

Calculator

Simple calculations can be performed.

Find phone

The paired phone will ring so you can find it. The phone and the watch must be linked and within the Bluetooth range.

Breathing guide

Follow the steps to breath in and out. You can select the duration and the intensity.

Massager

Click the green button to start the massage (vibration) and the red button to stop it.

Female assistant

Shows the status of women's menstrual period. On the app you can set and check the latest month end time, the menstrual period length, and the number of days between menstrual periods.

Menu style

There are different menu styles to choose from.

Timer

Select one of the preset times or customize your own time. Click on the start icon to start the countdown and click the reset icon to reset to the original time.

Games

You can distract yourself by playing some mini games.

Air Pressure

Displays the current air pressure. The phone and the watch must be linked so the watch can receive the info from the phone.

Settings

It includes the following functions:

- **Languages:** you can select the language of the smartwatch.
- **Dial Switch:** click on the desired screen to make it your home screen. On the app you can download other pre-designed home screens as well as select an image

saved on the phone to set as your home screen.

- **Screen on/off:**
 - **Bedside lamp:** if activated, it will display the time, date and charging status during charging.
 - **Screen off:** if activated, it shows the time on the screen when the smartwatch is in standby mode.
 - **Screen time:** select the seconds it will take for the screen to turn off when not in use. The longer the screen is on, the more battery it will use.
- **Vibration intensity:** select the intensity of the vibration of the smartwatch.
- **Power saving mode:** The screen brightness will decrease to save battery.
- **Smart mode selection:** when on watch mode, the watch will disconnect the Bluetooth connection and the watch can be used independently, making it more power-efficient. When the watch is on smart mode, the watch can connect to the APP on the phone and access more functions.
- **Ringtones setting:** you can select the ringtones in your smartwatch.
- **Password:** a 4-digit password can be set (if you forget the password, please enter 8762 to decrypt the previous

password).

- **Restore:** resets the smartwatch to factory settings (click "√" to confirm or "×" to exit). This function will erase all the data saved on the smartwatch.

Additional functions on the app (they can only be used if the smartwatch is linked)

Data synchronization

If the watch is successfully linked to the app, click to synchronize the latest data from the watch to the app.

Unlink

Click to unpair the smartwatch from the paired mobile phone. For IOS system, after unlink the watch, you need to go to the settings of the phone to ignore the Bluetooth device.

Camera remote control

The camera on the phone will open. Click on the camera icon on the screen of the smartwatch and the phone will take a photo. The photo will be saved in the phone's gallery.

Note: When the camera usage request appears, select “Allow” .

Health Monitor

If this function is activated, the smartwatch will automatically take heart rate test during the hours selected.

Find smartwatch

The smartwatch will vibrate so you can find it. The phone and the watch must be linked and within the Bluetooth range.

Turn wrist to turn on screen

If this function is activated, the smartwatch’ s screen will turn on when you lift your wrist.

Do not disturb mode

You can set a time interval in which the smartwatch will not receive notifications.

Sedentary reminder

If this function is activated, when you have been in the

same position for a long time, the smartwatch will vibrate and show the sedentary icon to remind you to get up and move.

Drink water reminder

If this function is activated, the smartwatch will vibrate and show the water reminder icon to remind you to drink water throughout the day.

Firmware update

If there is a new version of the smartwatch's firmware, you can update to the latest version.
